**Pipeline and Hazardous
Materials Safety Administration**

DOT-SP 13544
(FIFTH REVISION)

(FOR RENEWAL, SEE 49 CFR § 107.109)

1. GRANTEE: (See individual authorization letter)
2. PURPOSE AND LIMITATIONS:
 - a. This special permit authorizes the transportation in commerce of DOT Specification 4BA240 cylinders containing liquefied petroleum gas (LPG) and/or residue of LPG without hazard warning labels when transported by a motor vehicle that is placarded. This special permit provides no relief from the Hazardous Materials Regulations (HMR) other than as specifically stated herein. The most recent revision supersedes all previous revisions.
 - b. The safety analyses performed in development of this special permit only considered the hazards and risks associated with transportation in commerce. The safety analyses did not consider the hazards and risks associated with consumer use, use as a component of a transport vehicle or other device, or other uses not associated with transportation in commerce.
 - c. Unless otherwise stated herein, this special permit consists of the special permit authorization letter issued to the grantee together with this document.
3. REGULATORY SYSTEM AFFECTED: 49 CFR Parts 106, 107 and 171-180.
4. REGULATIONS FROM WHICH EXEMPTED: 49 CFR § 172.301(a) in that the proper shipping name and identification number need not be marked on each package, § 172.301(c) in that marking of the special permit number on each package is not required and § 172.401 in that each cylinder must be labeled, except as provided herein.

5. BASIS: This special permit is based on the application of Carlson Logistics dated March 7, 2013 and additional information dated July 23, 2013, submitted in accordance with § 107.105 and the public proceeding thereon.
6. HAZARDOUS MATERIALS (49 CFR § 172.101):

Hazardous Materials Description			
Proper Shipping Name	Hazard Class/ Division	Identification Number	Packing Group
Liquefied petroleum gas	2.1	UN1075	N/A
Propane	2.1	UN1978	N/A

7. SAFETY CONTROL MEASURES:
- a. PACKAGING - Prescribed packagings are DOT Specification 4BA240 steel cylinders.
- b. OPERATIONAL CONTROLS:
- (1) The cylinders must be transported on a motor vehicle that is placarded with "FLAMMABLE GAS" placards.
- (2) Shipping papers must reflect a correct current accounting of all cylinders both full and expended.
- (3) Cylinders must be secured in the vehicle in accordance with § 177.834(a).
8. SPECIAL PROVISIONS: A current copy of this special permit must be maintained at each facility where the package is offered for transportation.
9. MODES OF TRANSPORTATION AUTHORIZED: Motor vehicle.
10. MODAL REQUIREMENTS: None as a requirement of this special permit.

11. COMPLIANCE: Failure by a person to comply with any of the following may result in suspension or revocation of this special permit and penalties prescribed by the Federal hazardous materials transportation law, 49 U.S.C. 5101 et seq:

- o All terms and conditions prescribed in this special permit and the Hazardous Materials Regulations, Parts 171-180.
- o Persons operating under the terms of this special permit must comply with the security plan requirement in Subpart I of Part 172 of the HMR, when applicable.
- o Registration required by § 107.601 et seq., when applicable.

Each "Hazmat employee", as defined in § 171.8, who performs a function subject to this special permit must receive training on the requirements and conditions of this special permit in addition to the training required by §§ 172.700 through 172.704.

No person may use or apply this special permit, including display of its number, when the special permit has expired or is otherwise no longer in effect.

Under Title VII of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU)- 'The Hazardous Materials Safety and Security Reauthorization Act of 2005' (Pub. L. 109-59), 119 Stat. 1144 (August 10, 2005), amended the Federal hazardous materials transportation law by changing the term "exemption" to "special permit" and authorizes a special permit to be granted up to two years for new special permits and up to four years for renewals.

12. REPORTING REQUIREMENTS: Shipments or operations conducted under this special permit are subject to the Hazardous Materials Incident Reporting requirements specified in 49 CFR §§ 171.15 - Immediate notice of certain hazardous materials incidents, and 171.16 - Detailed hazardous materials incident reports. In addition, the grantee(s) of this special permit must notify the Associate Administrator for Hazardous Materials Safety in writing, of any incident involving a package, shipment or operation conducted under terms of this special permit.

Issued in Washington, D.C.

for Dr. Magdy El-Sibaie
Associate Administrator for Hazardous Materials Safety

Address all inquiries to: Associate Administrator for Hazardous Materials Safety, Pipeline and Hazardous Materials Safety Administration, Department of Transportation, Washington, D.C. 20590. Attention: PHH-31.

Copies of this special permit may be obtained by accessing the Hazardous Materials Safety Homepage at http://hazmat.dot.gov/sp_app/special_permits/spec_perm_index.htm Photo reproductions and legible reductions of this special permit are permitted. Any alteration of this special permit is prohibited.

CDCR Unveils Website to Alert the Public When Sex Offenders Remove GPS Devices

The CDCR unveiled a new web page August 10 that notifies the public when a sex offender removes his or her Global Positioning Satellite ankle monitor for the purposes of evading parole supervision.

The new web page posts the parolee's name, physical description, picture and last known whereabouts of those registered offenders on parole who have removed their ankle monitor. Alerts will be updated within hours of a warrant being issued.

Members of the media and the public are invited to subscribe via email to the alert system free of charge.

This web page was established following

a directive issued last week by Governor Arnold Schwarzenegger that CDCR notify the public and the media whenever a paroled sex offender removes his or her

GPS unit and absconds from parole.

CDCR already notifies law enforcement through the California Department of Justice's Criminal Intelligence and Investigation system alerts. The parolee descriptors are located in Parole Law Enforcement Automated Data System (LEADS).

To subscribe to alerts, visit the new web page <http://www.cdcr.ca.gov/parole/GPS-Wanted-Alerts.html> and input your email address. For more information on California

parole reform and public safety efforts please visit: www.cdcr.ca.gov and click on the Parole tab.

CCWF Female Fire Fighters Have Busy Summer as First Responders

This has been a busy summer for the inmate fire crew at Central California Women's Facility (CCWF), which has responded to a number of county-wide emergencies and situations where the specially-trained inmates were often the first to arrive at a variety of rural locations.

Recent incidents included two vehicle fires, three vegetation fires, two medical aids, and most notably a structure fire in the city of Chowchilla. Each year, these firefighters respond to nearly 1,200 calls.

Most recently, CCWF received a call reporting the fire of the home of a mother and her three daughters. Three firemen and five firefighters from CCWF responded to the emergency. The house suffered approximately \$140,000 in damages and was destroyed by the fire. Fortunately, there were no injuries

CCWF firefighters attempt to save a home.

suffered by the family or firefighters.

"I am sorry for the family that lost their home, but I am overjoyed that there were no injuries," said Warden (A) Javier Cavazos. "The responding female firefighters at CCWF did an excellent job."

The firehouse is the only station in

Madera County that is staffed around the clock. The Madera County Board of Supervisors has given the responsibility to CCWF to fill Self Contained Breathing Apparatus Bottles. The CCWF fire team now ensures the maintenance of life saving equipment for the remainder of the county's emergency responders.

"The Board of Supervisors in Madera County has shown an extreme amount of confidence in our institution's abilities going so far as to buy the team a new fire truck in 2008 to quicken their emergency response," Warden Cavazos continued.

The fire fighting crew at CCWF is definitely recognized an important part of this elite group of emergency personnel. For more information on CCWF, please visit the institution homepage at: http://www.cdcr.ca.gov/Facilities_Locator/CCWF.html

For more details on this information please visit the CDCR Intranet at <http://intranet/> or www.cdcr.ca.gov

Every community in America – regardless of its size, geographic location, demographic composition, or economic base -- aspires to become a place where families are safe, enjoy personal and environmental health, can select from a range of housing and transportation choices, and have access to educational and economic opportunities. These are the building blocks of livable communities.

Unfortunately, the federal government has all too often hindered or even blocked the ability of local communities to achieve these goals. In fact, federal policies have often led to today's unproductive and even destructive patterns of community neglect, inefficient energy use, economic dislocation, and environmental damage. Sadly, in many cases, American taxpayers have paid for it.

It's time to change this relationship. It's time to create a new, dynamic partnership in which the federal government enables and helps local governments create livable communities where people are safe, healthy and economically secure.

The Livable Communities Task Force recognizes that federal policies – from transportation to tax incentives to environmental regulations and everything in between – have a profound effect on the livability of communities. This Task Force seeks to identify the ways in which the federal government can affect community livability and improve Americans' quality of life. This includes reducing the nation's dependence on oil, protecting the environment, improving public health and investing in housing and transportation projects that create jobs and give people more commuting choices.

With significant resources, and in coordination with the administration's new Partnership for Sustainable Communities (which includes the Department of Housing and Urban Development, the Department of Transportation, and the Environmental Protection Agency), the Federal Government is poised to help communities take advantage of federal and local investment opportunities to provide a range of housing and transportation choices, create safer and healthier communities, strengthen their economies, and protect their environment.

In accordance with the Partnership for Sustainable Communities, the Livable Communities Task Force endorses the following six livability principles. Successful incorporation of these principles into policy making at all levels of government will greatly enhance the livability of all rural and urban American communities. It will also help communities across the country proactively address and adapt to the threats of climate change, preserve natural resources and open space, and contribute to cleaner air and water.

- **Provide more transportation choices.** Develop safe, reliable, and economical transportation choices to decrease household transportation costs, reduce our nation's dependence on foreign oil, improve air quality, reduce greenhouse gas emissions, and promote public health.

- **Promote equitable, affordable housing.** Expand location- and energy-efficient housing choices for people of all ages, incomes, races, and ethnicities to increase mobility and lower the combined cost of housing and transportation.

- **Enhance economic competitiveness.** Improve economic competitiveness through reliable and timely access to employment centers, educational opportunities, services and other basic needs by workers, as well as expanded business access to markets.

- **Reinvest in existing communities.** Target federal funding toward existing communities—through strategies like transit oriented, mixed-use development, and land recycling—to increase community revitalization and the efficiency of public works investments and safeguard rural landscapes.

• **Coordinate and leverage federal policies and investment.** Align federal policies and funding to remove barriers to collaboration, leverage funding, and increase the accountability and effectiveness of all levels of government to plan for future growth, including making smart energy choices such as locally generated renewable energy.

• **Value communities and neighborhoods.** Enhance the unique characteristics of all communities by investing in healthy, safe, and walkable neighborhoods—rural, urban, or suburban.
